- WxHxD 280x78x78mm
- Operation only at 230V / 50Hz, max.16A, 3600W
- 1.9m lead with mains plug
- Stainless steel housing, sockets with a silver plastic ring

USB charging sockets: 5V = ± 5%, total max.2.1A USB:
Stand-by consumption only 0.07W
Charging efficiency Ø 80.89%

Safety instructions and important information!

In order to guarantee safety at all times and to use the full performance spectrum of the device, please read the safety instructions carefully and carefully!

The product must not be modified technically or mechanically, otherwise the operating license and conformity will expire with immediate effect! The nameplate / imprint must not be removed under any circumstances! Check the product for damage before each use. If the product is damaged, it must be checked, repaired or replaced by a specialist company and disposed of in accordance with the applicable guidelines (footer page 1). Under no circumstances may a damaged or defective product continue to be used! Please be sure to secure all packaging material and accessories, especially small parts such as screws and foils, from children and animals. Suffocation hazard! In the event of non-compliance with the instructions or improper use, the manufacturer Improper use or changes made to the product, no liability whatsoever for property damage or personal injury. This product must never be operated, kept, stored or stored in the reach of children or animals. If this product is passed on, the instructions and packaging must be included. Thanks! We reserve the right to make misprints or changes to packaging, the product or the instructions.

Separate safety instructions

The devices must never be plugged into one another. Operation is only permitted individually. The device must never be covered during operation. Operation is only to be carried out in dry indoor rooms with a humidity of <80%. The output power of 3600 watts must never be exceeded.

Intended use as well as information on the USB connection.

The USB connection sockets have an output voltage of 5V (± 5%). This makes the USB connections suitable for charging mobile devices such as cell phones, tablets or MP3 players, for example. The products are only suitable for use in dry indoor areas: Using non-standardized cables or plugs can damage the socket and / or the connected devices. The USB connector should always be inserted carefully and without applying too much pressure. Be careful not to tilt the connector. To assess the charging time and battery behavior, you should check the manufacturer's information on the device to be connected. A fully charged device must not remain in the charging socket. The USB connector A can only be inserted on one side.

Electronic products that are marked with the crossed-out garbage can do not belong in the household waste! You can hand these products in free of charge at municipal collection points. Inquire at your local authority, the responsible town hall or a local or municipal waste disposal company. Thanks very much. Used batteries should not be put in the household garbage. Consumers are legally obliged to bring batteries to a suitable collection point at the trade or municipality. Old batteries may contain pollutants or heavy metals that can damage the environment and health. The symbols under the label (garbage can) stand for: Pb: Battery contains lead, Cd: Battery contains cadmium Hg: battery contains mercury. The environment and ChiliTec say thank you.
